# Atharv Sankpal

Full Stack Engineer — Backend & Data Systems

Pune, India | 8180937833 | 01atharvsankpal@gmail.com | Portfolio | LinkedIn | GitHub

## Professional Experience

**Peopleblox.io** **Sep 2025 – Present**

*Full Stack Engineer | Postgres, Express.js, Next.js, Streams, Queues, Async Tasks, GCP, k8s* *Pune, IN (Hybrid)*

- Delivered end-to-end features by writing efficient SQL queries, exposing them via secure nodejs REST APIs and consuming them in reusable and extensible React + MUI components to deliver pixel-accurate designs
- Optimized a critical production PostgreSQL analytics query removing bad JOIN cardinality and introducing early filter logic, reducing latency from **17s to 400ms**
- Implemented a temporal snapshot and diffing system to track employee role changes, skill gaps, and review transitions with high data consistency
- Implemented DB-to-client data streaming for high-volume reports, eliminating application-level buffering and **reducing report generation time by 10 times**

**ByteProLabs** **Jan 2025 – Mar 2025**

*Full Stack Engineer (Intern) | Next.js, FastAPI, MongoDB, WebHooks, FlutterFlow* *Bengaluru, IN (Hybrid)*

- Built and shipped full-stack web and mobile MVPs using Next.js, FastAPI, MongoDB, and no-code tools under tight delivery timelines
- Built reusable, modular codebases to accelerate delivery across multiple product iterations

## Featured Projects

**EduPrep: Online Examination Platform** | *Next.js, Express.js, Flask, MongoDB, Docker, AWS, OpenCV* Live | GitHub

- Deployed a **multi-tenant SaaS on AWS**, used by real students for preparation of MHT-CET using full length mock and customized exams
- Implemented **exam-grade client proctoring** including full-screen enforcement, tab-switch detection, auto-submission, and strict time controls
- Implemented an OpenCV-based inference pipeline orchestrating multiple open-source vision models for real-time cheat detection with cost-efficient staged verification
- Built a teacher dashboard enabling effortless test sharing, real-time performance tracking, and visibility into proctoring flags without manual grading

**Student Result Management Platform** | *Next.js, Express.js, PostgreSQL, Shadcn-UI, TypeScript*

- Engineered a responsive White-labeled result portal with OTP-based auth and role-aware access controls for multi-section student records
- Built an interactive, Excel-like data grid (editable cells, keyboard navigation, validation) to streamline usage for non-technical staff
- Designed a resilient **bulk-upload ETL pipeline** to parse diverse Excel formats, normalize schemas, and automatically resolve duplicates/missing fields
- Hardened backend security by implementing **granular DB user roles** and least-privilege connections for each user role actor, minimizing attack surface and SQL injection vectors

**AgriAI** | *React.js, Express.js, MongoDB, Flask, CNN* GitHub

- Integrated a pre-trained CNN-based crop disease detection model into a full-stack system using Flask and Express.js
- Implemented the end-to-end multihop inference pipeline including image uploads, API orchestration, and real-time result delivery to the frontend
- Built a multilingual, farmer-friendly React UI to present actionable treatment recommendations

## Technical Skills

- **Languages**: TypeScript, JavaScript, Python
- **Frontend**: Next.js, React.js, Redux Toolkit, Tailwind CSS
- **Backend & Databases**: PostgreSQL, Express.js, Nest.js, MongoDB, Prisma
- **DevOps & Infrastructure**: Queues, Data Streaming, CRON Jobs, Docker, AWS, GCP, Kubernetes, Logging

## Leadership & Recognition

- **Hackathon Success**: 3× State-level Winner, 1× State-level Runner-up, 2× National-level Finalist across technical hackathons
- **Co-Curricular**: Taught **300+** students programming and DSA via multiple bootcamps spanning **4 years**

## Education

**B.Tech in Computer Science and Engineering (CGPA: 8.3)** **2021 – 2025**

*Annasaheb Dange College of Engineering and Technology (ADCET), Ashta* *Maharashtra, India*
